

Minogue Park carpark repairs

April - June

- As use of Minogue Park has increased in recent years, so has the number of vehicles using the car park.
- There are several spots in the car park where heavy traffic use combined with the peat soil below the surface has caused the pavers to begin to deteriorate. This includes multiple sunken areas in the paved surface.
- You may have seen water pooling in the car park in some places, and we need to prevent that from happening which contributes to the deterioration of the pavers.
- To ensure the condition of the car park does not worsen, we need to have repairs done. This is part of our asset management programme and it's important renewals work.
- We have arranged for repairs to be undertaken during the working week (Monday to Friday) from 18 April to 13 June. Our contractors will work on one or two spots at a time, and be off-site by 4pm every day.
- There may be some loss of car parks while this work is done, but the majority of the car park will still be available to park users.
- This is NOT a complete resurfacing of the car park, and at no time will the car park be unavailable.
- Please keep well clear of the contractors while they are working on the car park.
- We encourage you to share this information with other park users in your sport, club, school or team.

Thank you for your co-operation while this project is underway. If you have any questions, please don't hesitate to contact us.
