

BELIEFS ABOUT LEARNING
WHAT OUR STAFF SAY
ABOUT LEARNING

LEARNING IS...

a life-time process

different for
everyone

sometimes
incidental...and
often sequential

Discovering new things

**A PERSONALISED JOURNEY
FOR EVERY LEARNER**

the acquisition of skills and dispositions that people have in different measures

SELF-REFLECTION

SELF-DISCOVERY

a natural curiosity and willingness to investigate the world around us

expanding the mind through mental,
physical/practical, prayerful/emotional,
self-awareness/self-discipline opportunities

PERSONAL GROWTH

new skills, habits and knowledge

something everyone can do

We believe people learn most powerfully
and deeply when...

relationships are strong

emotions and passion are engaged in the learning

self-belief is encouraged

it's challenging, purposeful, exciting and fun

learners have a say over what and how they learn

there is interest in and relevancy of the material

we are prepared to make mistakes in order to learn

it is extended beyond the classroom

we understand that failing is integral to learning

questions are asked, assumptions are tested

learners change how they feel, think or act

the learning can be applied to real situations

learners are motivated

the school, whaanau and community supports the learning
